Education

B.Tech in Computer Science Engineering

Vidyavardhaka College of Engineering (VTU)

CGPA: 8.14/10

2020 – 2024

Work Experience

Cisco Systems, Inc - Full-Stack Engineer

November 2024 – Present

Cisco ISE (Identity Services Engine) – Backend Focus

- Developed backend services in **Java Spring Boot** and **server-side technologies** for the **RADIUS export feature** (centralised Auth and accounting system), contributing to **SaaS product components** of a security platform and integrating with **frontend**
- Designed and implemented **efficient database architectures** for **relational databases**, optimizing performance through **POSTGRESQL ANALYZE** and advanced indexing strategies.
- Built and deployed **microservices** on **AWS** using **Docker**, **Kubernetes (EKS)**, and automated **Jenkins CI/CD** pipelines.

Cisco NDB (Nexus Dashboard) – Frontend Focus

- Started as a frontend engineer converting **class-based React components to modern functional components**.
- Migrated build process from React-Webpack to Vite-Snowpack, **reducing compile time by 86%** and boosting developer productivity.
- Contributed to API integrations and performance optimizations for a large-scale SaaS networking platform.

NeuroFlares Innovations Pvt Ltd — Software Engineer (Intern)

Sep 2023 – Feb 2024

- Led a team of 4 engineers to develop a **real-time multiplayer game server** using **React**, **Firestore**, and **GraphQL** for optimized data fetching.
- Integrated **CDN** services for faster loading of static content, reducing asset delivery time by over 30%.
- Implemented pathfinding algorithms for efficient character navigation, reducing processing overhead.

Technical Skills

Backend: Spring Boot, J2EE, REST APIs, Kafka, SQL, Maven, Gradle

Frontend: JavaScript, React, Next.js, HTML5, CSS3, TailwindCSS

Cloud & DevOps: AWS (ECS, S3, RDS, EKS), Docker, Kubernetes, CI/CD, Terraform

Projects

Home Lab Media Hosting Server

- Built a self-hosted media server using Raspberry Pi 5, running containerized services via **Kubernetes (EKS)**.
- Implemented Vert.x for lightweight, high-performance backend APIs.

Sonic Bits iOS App

- Built an iOS pocket sampler app for recording, editing, and playing custom audio.
- Implemented efficient audio processing to ensure smooth playback, low latency, and a seamless user experience on iOS devices.
